

travis smith

who's he?

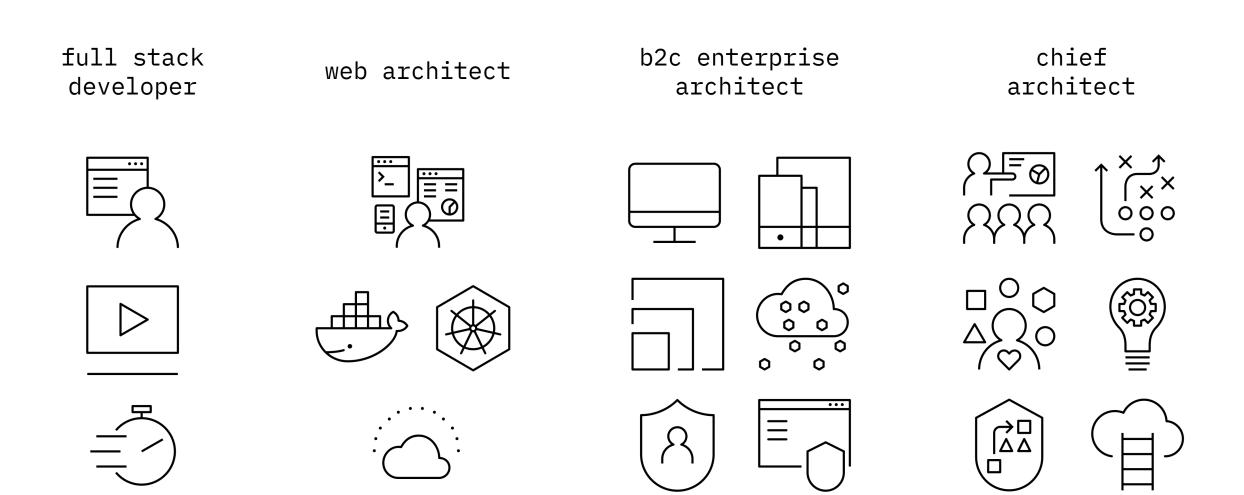

As an accomplished, future-oriented, performance-driven technologist, collaborator and leader, I continually expand upon my existing skill set to innovate, disrupt, strategically improve existing processes, & educate colleagues on the implementation of new technologies with an uncompromising & unapologetic commitment to excellence.

travis's journey

travis's journey @ ibm

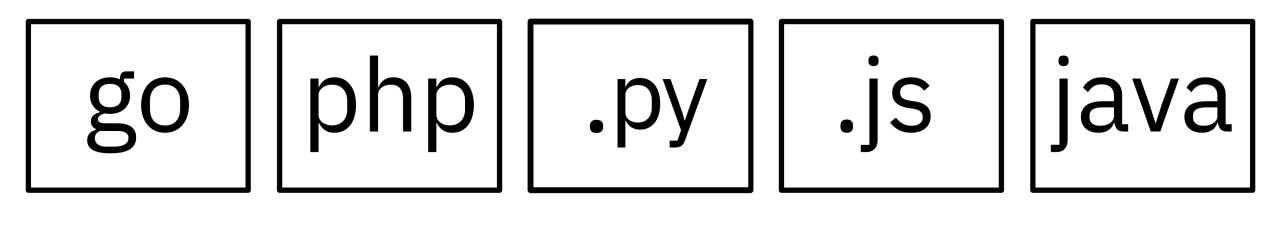

that's great...that's where he's been...but what does he do?

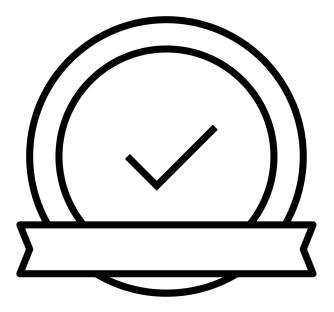

he knows his languages

(besides forgetting how to read high german, ελληνιστική & אָברִית greek & hebrew)

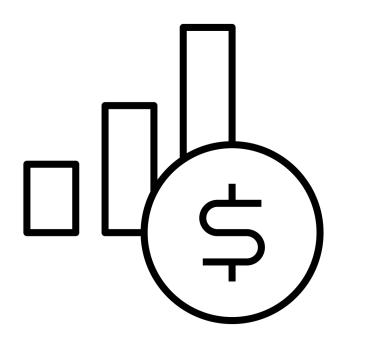

he's also very fluent in english & southern.

he wins awards

IBM's OTAA Winner - twice
(for IBM Cloud & Watson Ads), plus
+ COVID Data Lake OTAA
+ Architect for UPSX OTAA

IBM's Eminence & Excellence Award Winner

he negotiates & saves a lot of money

- Manages \$10M Multi-CDN Budget with 30% YoY savings
- Reduced Cloud spend \$2M/yr
- Decreased operational expenses 2x

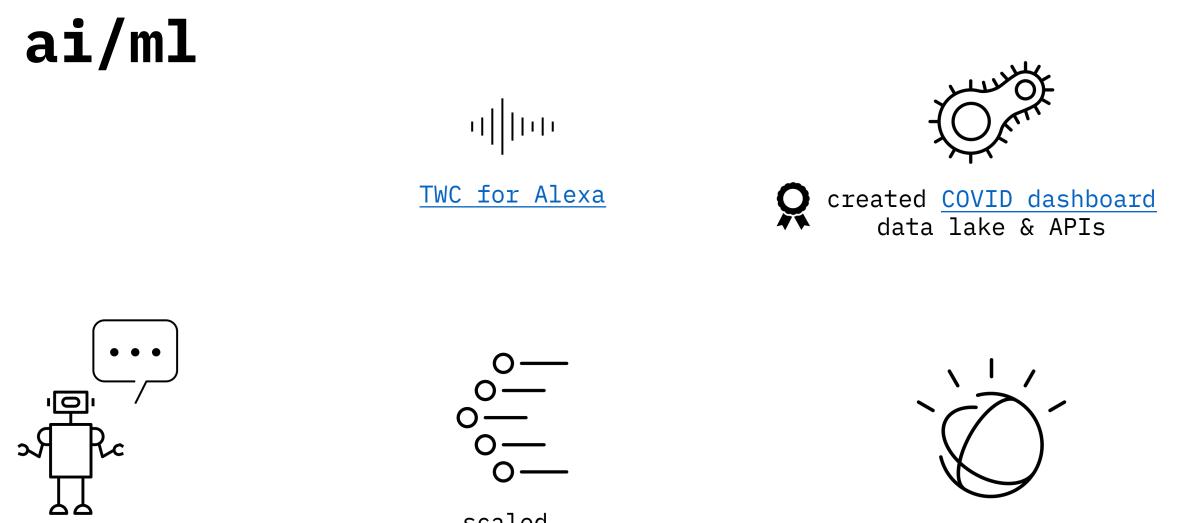

he leads well

Serves on:

- 2 IBM Patent Development Teams
- STSM Appointment Board
- IBM Cloud Architecture Guild
- Gates Foundation Wisdom Council
- Ga. St. Univ. CS Advisory Board

ok. looks good, but what has he really done?

facebook bot

scaled IBM Cognos Analytics

Watson personal assistant

modernization

weather.com to K8S backend-for-frontend location services to K8S SUN API monolith decomposition to microservices

@scale LS + SUN = 1.5 trillion requests per day Hurricanes = peaks of ~30k rps

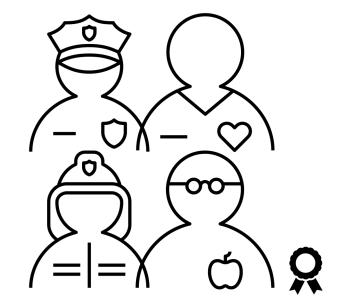

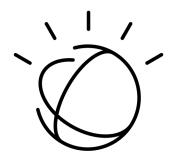

real agile architecture

TWC ALIx architecture agnostic geo-alerting (2x faster than any 3rd party)

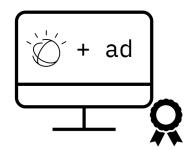

TWC Privacy By Design

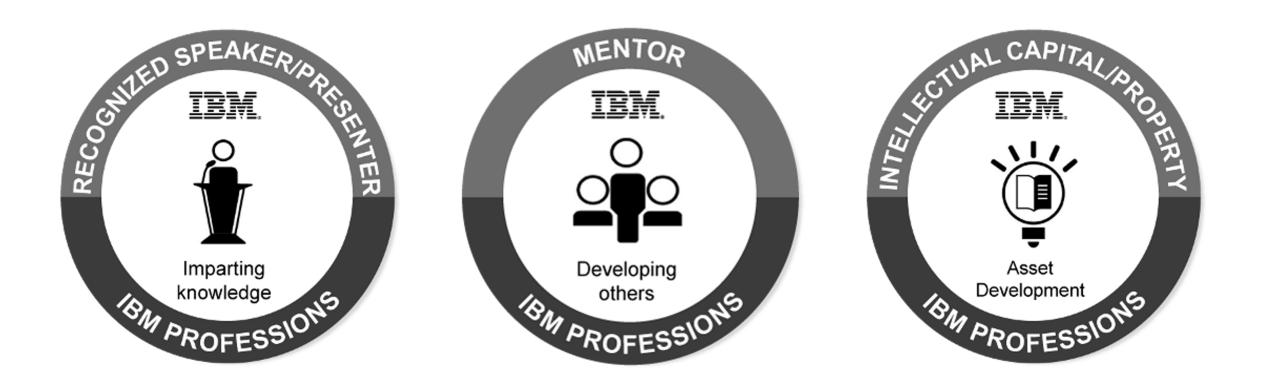

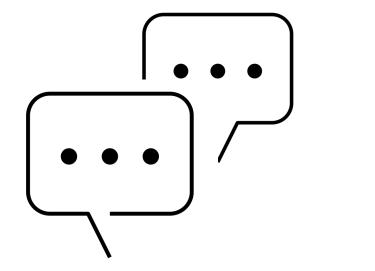

Created Watson Core's reference architecture go-to-market & inner-sourcing

Watson Advertising Ad Builder (NLP conversational ad) TWC UPSx architecture consumer profiles (~10k rps; IBM's ID: 50 rps)

teacher, speaker & mentor

don't just take his word, what do others say?

ivan's impression

...without him, I don't know how we would have achieved anything close to GDPR readiness.

With respect to patenting, Travis was one of the first technologists at The Weather Company to get engaged with the IBM patent process, learning how it worked and mentoring other people....

Ivan Milman, STSM IBM

Neil Katz Chief Customer Officer Advance Local 4-time Emmy Winner as Chief Editor

neil's note

Travis has clearly demonstrated technical innovation and forward thinking...

Travis is also excellent at building a technical community through engaging multiple internal IBM teams and external developers.

dave's details

He provided leadership to help us transition the Watson Ads platform to Cloud...define the security and API infrastructure. With his expertise and guidance, we've grown the Watson Ads platform into a fully-fledged SaaS tool available IBM Marketplace. His efforts helped us evaluate new optimized processes for bringing cognitive services into the platform employing Docker, Kubernetes, and he's helping us transition to IKS for continued efficiency and scalability.

Dave Olesnevich Chief Product Officer Watson Advertising, IBM

Daryl Partin Global Head of Data Management, IBM

daryl's declaration

Travis has an extraordinary depth and breadth in technical innovation, a keen eye for understanding business impact and application, and the unique ability to lead by doing when building a collaborative community and culture.

jason's jots

Of the hundreds of people that work within WM&W, all being very professional and good at their jobs, Travis technical prowess and leadership abilities stand above the majority.

Jason Summerour Head of Code Pattern Development IBM

Dan Berg Architect @ Oracle Distinguished Engineer, IBM Cloud

berg's beat

I would consider him an expert in cloud-native architecture, deployment, and operations. I was always impressed with Travis and his depth of knowledge for designing a highly available application running within a Kubernetes environment.
